

Social Security Administration

§416.933

following are examples of a good reason for not following treatment:

(1) The specific medical treatment is contrary to the established teaching and tenets of your religion.

(2) The prescribed treatment would be cataract surgery for one eye when there is an impairment of the other eye resulting in a severe loss of vision and is not subject to improvement through treatment.

(3) Surgery was previously performed with unsuccessful results and the same surgery is again being recommended for the same impairment.

(4) The treatment because of its enormity (e.g. open heart surgery), unusual nature (e.g., organ transplant), or other reason is very risky for you; or

(5) The treatment involves amputation of an extremity, or a major part of an extremity.

[45 FR 55621, Aug. 20, 1980, as amended at 59 FR 1636, Jan. 12, 1994; 62 FR 6429, Feb. 11, 1997]

PRESUMPTIVE DISABILITY AND BLINDNESS

§416.931 The meaning of presumptive disability or presumptive blindness.

If you are applying for supplemental security income benefits on the basis of disability or blindness, we may pay you benefits before we make a formal finding of whether or not you are disabled or blind. In order to receive these payments, we must find that you are presumptively disabled or presumptively blind. You must also meet all other eligibility requirements for supplemental security income benefits. We may make these payments to you for a period not longer than 6 months. These payments will not be considered overpayments if we later find that you are not disabled or blind.

[45 FR 55621, Aug. 20, 1980, as amended at 57 FR 53853, Nov. 13, 1992]

§416.932 When presumptive payments begin and end.

We may make payments to you on the basis of presumptive disability or presumptive blindness before we make a formal determination about your disability or blindness. The payments can not be made for more than 6 months. They start for a period of not more

than 6 months beginning in the month we make the presumptive disability or presumptive blindness finding. The payments end the earliest of—

(a) The month in which we make a formal finding on whether or not you are disabled or blind;

(b) The month for which we make the sixth monthly payment based on presumptive disability or presumptive blindness to you; or

(c) The month in which you no longer meet one of the other eligibility requirements (e.g., your income exceeds the limits).

[45 FR 55621, Aug. 20, 1980, as amended at 57 FR 53853, Nov. 13, 1992]

§416.933 How we make a finding of presumptive disability or presumptive blindness.

We may make a finding of presumptive disability or presumptive blindness if the evidence available at the time we make the presumptive disability or presumptive blindness finding reflects a high degree of probability that you are disabled or blind. In the case of readily observable impairments (e.g., amputation of extremities, total blindness), we will find that you are disabled or blind for purposes of this section without medical or other evidence. For other impairments, a finding of disability or blindness must be based on medical evidence or other information that, though not sufficient for a formal determination of disability or blindness, is sufficient for us to find that there is a high degree of probability that you are disabled or blind. For example, for claims involving the human immunodeficiency virus (HIV), the Social Security Field Office may make a finding of presumptive disability if your medical source provides us with information that confirms that your disease manifestations meet the severity of listing-level criteria for HIV. Of course, regardless of the specific HIV manifestations, the State agency may make a finding of presumptive disability if the medical evidence or other information reflects a high degree of probability that you are disabled.
