

§ 416.969

20 CFR Ch. III (4–1–01 Edition)

§ 416.967(b) and Rule 202.00(f) of appendix 2 of subpart P of part 404 of this chapter.)

[45 FR 55621, Aug. 20, 1980, as amended at 65 FR 18001, Apr. 6, 2000]

§ 416.969 Listing of Medical-Vocational Guidelines in appendix 2 of subpart P of part 404 of this chapter.

The *Dictionary of Occupational Titles* includes information about jobs (classified by their exertional and skill requirements) that exist in the national economy. Appendix 2 provides rules using this data reflecting major functional and vocational patterns. We apply these rules in cases where a person is not doing substantial gainful activity and is prevented by a severe medically determinable impairment from doing vocationally relevant past work. The rules in appendix 2 do not cover all possible variations of factors. Also, as we explain in § 200.00 of appendix 2, we do not apply these rules if one of the findings of fact about the person's vocational factors and residual functional capacity is not the same as the corresponding criterion of a rule. In these instances, we give full consideration to all relevant facts in accordance with the definitions and discussions under vocational considerations. However, if the findings of fact made about all factors are the same as the rule, we use that rule to decide whether a person is disabled.

§ 416.969a Exertional and non-exertional limitations.

(a) *General.* Your impairment(s) and related symptoms, such as pain, may cause limitations of function or restrictions which limit your ability to meet certain demands of jobs. These limitations may be exertional, non-exertional, or a combination of both. Limitations are classified as exertional if they affect your ability to meet the strength demands of jobs. The classification of a limitation as exertional is related to the United States Department of Labor's classification of jobs by various exertional levels (sedentary, light, medium, heavy, and very heavy) in terms of the strength demands for sitting, standing, walking, lifting, carrying, pushing, and pulling. Sections 416.967 and 416.969 explain how we use

the classification of jobs by exertional levels (strength demands) which is contained in the *Dictionary of Occupational Titles* published by the Department of Labor, to determine the exertional requirements of work which exists in the national economy. Limitations or restrictions which affect your ability to meet the demands of jobs other than the strength demands, that is, demands other than sitting, standing, walking, lifting, carrying, pushing or pulling, are considered non-exertional. Sections 416.920(f) and 416.994(b)(5)(viii) explain that if you can no longer do your past relevant work because of a severe medically determinable impairment(s), we must determine whether your impairment(s), when considered along with your age, education, and work experience, prevents you from doing any other work which exists in the national economy in order to decide whether you are disabled (§ 416.920(f)) or continue to be disabled (§ 416.994(b)(5)(viii)). Paragraphs (b), (c), and (d) of this section explain how we apply the medical-vocational guidelines in appendix 2 of subpart P of part 404 of this chapter in making this determination, depending on whether the limitations or restrictions imposed by your impairment(s) and related symptoms, such as pain, are exertional, nonexertional, or a combination of both.

(b) *Exertional limitations.* When the limitations and restrictions imposed by your impairment(s) and related symptoms, such as pain, affect only your ability to meet the strength demands of jobs (sitting, standing, walking, lifting, carrying, pushing, and pulling), we consider that you have only exertional limitations. When your impairment(s) and related symptoms only impose exertional limitations and your specific vocational profile is listed in a rule contained in appendix 2, we will directly apply that rule to decide whether you are disabled.

(c) *Nonexertional limitations.* (1) When the limitations and restrictions imposed by your impairment(s) and related symptoms, such as pain, affect only your ability to meet the demands of jobs other than the strength demands, we consider that you have only
