

§ 75.11

(3) In §§75.33 and 75.34, DOE/NRC Form 741 is approved under control number 3150-0003.

(4) In §§75.34 and 75.35, DOE/NRC Form 740M is approved under control number 3150-0057.

(5) In §75.35, DOE/NRC Form 742C is approved under control number 3150-0058.

[49 FR 19628, May 9, 1984, as amended at 62 FR 52189, Oct. 6, 1997]

INSTALLATION INFORMATION

§ 75.11 Installation information.

(a) Each licensee subject to the provisions of this part shall submit installation information, in response to a written request from the Commission, with respect to any installation which the Commission indicates has been identified under the Agreement and in which the licensee carries out licensed activities. (The Commission request shall state whether the installation has been identified under Article 39(b) of the principal text of the Agreement or Article 2(a) of the Protocol.) The licensee shall submit such information to the Commission within the period, which shall be at least 45 days, specified in the Commission's request.

(b) Installation information includes:

(1) The identification of the installation, stating its general character, purpose, nominal capacity (thermal power level, in the case of power reactors), and geographic location, and the name and address to be used for routine purposes;

(2) A description of the general arrangement of the installation with reference, to the extent feasible, to the form, location and flow of nuclear material, and to the general layout of important items of equipment which use, produce, or process nuclear material;

(3) A description of features of the installation relating to material accounting, containment, and surveillance; and

(4) A description of the existing and proposed procedures at the installation for nuclear material accounting and control, with special reference to material balance areas established by the licensee, measurement of flow, and procedures for physical inventory taking. (As part of this description, the li-

10 CFR Ch. I (1-1-01 Edition)

icensee may identify a process step involving information which it deems to be commercially sensitive and for which it proposes that a special material balance area be established so as to restrict IAEA access to such information.)

(c) Each licensee shall thereafter submit to the Commission information with respect to any modification at the installation affecting the information referred to in paragraph (a) of this section. Such information shall be submitted:

(1) With respect to a modification of a type described in the license conditions: At least 70 days before the modification is scheduled to be completed, except that in an emergency or other unforeseen situation a shorter period may be approved by the Commission.

(2) With respect to any other modification relevant to the application of the provisions of the Agreement: At the time the first inventory change report is submitted after the modification is completed.

(d) The information specified in paragraphs (a) and (c) of this section shall be prepared on Form N-71 or other forms supplied by the Commission (including appropriate IAEA Design Information Questionnaire forms). The information shall be sufficiently detailed to enable knowledgeable determinations to be made in the development of Facility Attachments or amendments thereto, including:

(1) Identification of the features of installations and nuclear material relevant to the application of safeguards to nuclear material in sufficient detail to facilitate verification;

(2) Determination of IAEA material balance areas to be used for IAEA accounting purposes and selection of those strategic points which are key measurement points and which will be used to determine flow and inventory of nuclear material;

(3) Establishment of the nominal timing and procedures for taking of physical inventory of nuclear material for IAEA accounting purposes;

(4) Establishment of the records and reports requirements and records evaluation procedures;

(5) Establishment of requirements and procedures for verification of the

Nuclear Regulatory Commission

§ 75.13

quantity and location of nuclear material; and

(6) Selection of appropriate combinations of containment and surveillance methods and techniques at the strategic points at which they are to be applied.

(e) The licensee's detailed security measures for the physical protection of an installation shall be included in the installation information only when and to the extent specifically requested by the Commission.

[45 FR 50711, July 31, 1980, as amended at 49 FR 19628, May 9, 1984]

§ 75.12 Communication of information to IAEA.

(a) Except as otherwise provided in this section, the Commission will furnish to the IAEA all information submitted under §§ 75.11 and 75.14.

(b)(1) A licensee may request that information of particular sensitivity, which it customarily holds in confidence, not be transmitted physically to the IAEA. A licensee who makes such a request should, at the time the information is submitted, identify the pertinent document or part thereof and make a full statement of the reasons supporting the request. The licensee shall retain a copy of the request and all documents related to the request as a record until the Commission terminates the license for each installation involved with the request or until the Commission notifies the licensee that the licensee is no longer under the agreement. Superseded material must be retained for three years after each change is made.

(2) In considering such a request, it is the policy of the Commission to achieve an effective balance between legitimate concerns of licensees, including protection of the competitive position of the owner of the information, and the undertaking of the United States to cooperate with the IAEA to facilitate the implementation of the safeguards provided for in the Agreement. The Commission will take into account the obligation of the IAEA to take every precaution to protect commercial and industrial secrets and other confidential information coming to its knowledge in the implementation of the Agreement.

(3) If a request is denied, the Commission will notify the applicant with a statement of reasons. The notice of denial will specify a time, not less than ten (10) days after the date of the notice, when the information will be transmitted physically to the IAEA.

(4) If a request is granted, the Commission will determine a location where the information will remain readily available for examination by the IAEA and will so inform the licensee. The licensee shall retain this information as a record until the Commission terminates the license for the installation involved with the request or until the Commission notifies the licensee that the licensee is no longer under the agreement. Superseded material must be retained for three years after each change is made.

(c) A request made under § 2.790(b) of this chapter will not be treated as a request under this section unless the application makes specific reference to this section, nor shall a determination to withhold information from public disclosure necessarily require a determination that such information not be transmitted physically to the IAEA.

(d) Where consistent with the Agreement, the Commission may at its own initiative, or at the request of a licensee, determine that any information submitted under §§ 75.11 and 75.14 shall not be physically transmitted to, or made available for examination by, the IAEA.

[45 FR 50711, July 31, 1980, as amended at 53 FR 19262, May 27, 1988]

§ 75.13 Verification.

(a) Each licensee subject to the provisions of this part shall afford to the IAEA during normal working hours, pursuant to prior notice from the Commission, opportunity to visit the installation to verify the installation information submitted under § 75.11. The licensee may accompany IAEA representatives who visit the installation for such purpose, provided that the IAEA representatives shall not be delayed or otherwise impeded in the exercise of their functions.

(b) The notice from the Commission may be given by telephone or in writing and shall provide the licensee actual knowledge of the visit at least
