

## Federal Property Management Regulations

## § 101-25.101-5

(7) Where market conditions are such that supply through storage and issue is required to assure adequate supply.

(8) Where stocking of supplies and equipment necessary for implementation of emergency plans is required for an indefinite period.

### § 101-25.101-3 Supply through consolidated purchase for direct delivery to use points.

The following criteria shall govern in determining whether an item can be most advantageously supplied through consolidated purchase for direct delivery to use points:

(a) The items shall be equipment or supply items of such a character that it is feasible to forecast requirements for delivery to specific use points; and

(b) Conditions exist where any of the following factors requires consolidated purchasing of such items for direct delivery to use points—

(1) Where greatest price advantage, both direct and indirect costs considered, is obtainable through large definite quantity purchasing.

(2) Where an item is of special manufacture or design and is not readily available from commercial sources.

(3) Where market conditions are such that central procurement is required to assure adequate supply.

(4) Where contracts for production quantities are necessary to secure timely deliveries and advantageous prices.

(5) Where the quantity is large enough to assure lowest transportation costs or, conversely, where transportation costs for small quantity redistribution are so excessive that it is not feasible to store and issue the items.

### § 101-25.101-4 Supply through indefinite quantity requirement contracts.

The following criteria shall govern in determining whether an item can be most advantageously supplied through the medium of indefinite quantity requirement contracts covering specific periods and providing for delivery to use points as needs arise:

(a) The item shall be such a character that—

(1) Handling on a storage and issue basis is not economically sound, under the criteria prescribed in § 101-25.101-2;

(2) Rate of use and frequency of ordering at use points is estimated to be sufficient to warrant the making of indefinite quantity requirement contracts;

(3) It is either not feasible to forecast definite requirements for delivery to specific use points (as in the case of new items initially being introduced into a supply system), or no advantage accrues doing so; and

(b) Industry distribution facilities are adequate properly to serve the use points involved; and

(c) Conditions exist where any of the following factors requires the maintaining of indefinite quantity requirements contracts—

(1) Advantage to the Government is greater than would be secured by definite quantity procurements by individual offices or agencies (the determining consideration being one of overall economy to the Government, rather than one of direct comparison of unit prices of individual items obtainable through other methods of supply); or no known procurement economies would be effected but the requirements of offices of agencies can best be served by indefinite quantity requirements contracts.

(2) Acute competitive bidding problems exist because of highly technical matters which can best be met on a centralized contracting basis.

(3) The item is proprietary or so complex in design, function, or operation as to be noncompetitive and procurement can best be performed on a centralized contracting basis.

### § 101-25.101-5 Supply through local purchase.

The following criteria shall govern in determining whether an item should be supplied through local purchase:

(a) Urgency of need requires local purchase to assure prompt delivery;

(b) The items are perishable or subject to rapid deterioration which will not permit delay incident to shipment from distant points;

(c) The local purchase is within applicable limitation established by the agency head; or

(d) Local purchase will produce the greatest economy to the Government.
