

verify an NSN when only the characteristics of the item are known or descriptive data when the NSN is known, and to determine interchangeable or substitutable items.

(3) *Consolidated Management Listing*. A microfiche publication which is a consolidated listing of NSN's and related supply management data of each integrated manager and military service. These data include Government source of supply, unit of issue, unit price, etc.

(4) *Federal item logistics data records (FILDR)*. A microfiche publication containing complete identification data in tabular format for all descriptive-type item identifications. The data are arranged in NSN sequence within Federal supply class. An FILDR is known in hard copy form as a DD-146 card which is furnished as an output to authorized receivers of Federal catalog data who cannot use other available output media.

(5) *Defense Logistics Agency (DLA) Federal Supply Catalog for Civil Agencies*. This publication (available in hard copy only) includes NSN's for which DLA is the single source of supply for civil agencies. These NSN's may not necessarily have a DOD user recorded. The publication contains descriptive and management data for items not usually listed in the GSA catalog but which might be required by civil agencies.

(b) Agencies may obtain without charge copies of the DLA Federal Supply Catalog for Civil Agencies, described in paragraph (a)(6)¹ of this section by contacting the Defense Logistics Services Center, DLSC-TP, Federal Center, Battle Creek, MI 49016. To obtain copies of the publications described in paragraphs (a) (1) through (5) of this section, agencies may submit a request in writing to the same address shown above, except that the applicable mail distribution code is DLSC-AP. Information concerning the charges for the latter publications is available from DLSC-AP.

[42 FR 36255, July 14, 1977, as amended at 46 FR 35645, July 10, 1981]

¹At 46 FR 35645, July 10, 1981, paragraph (a)(6) of § 101-30.401-1 was removed.

§ 101-30.401-2 Automated catalog data output.

As a result of participation in the Federal catalog system, activities may receive data directly from DLSC tailored to their individual needs in support of their own supply management data system. The two basic categories of file maintenance are:

(a) *Simplified file maintenance (SFM)*. Subscribers to this category of file maintenance are provided replacement files (magnetic tape) semiannually containing selected technical and supply management data for those items on which they are a registered user. The subscriber will also receive a monthly maintenance update and cumulative monthly basic records from DLSC which may be used to maintain the semiannual basic file. Recipients of this form of file maintenance have latitude in selecting those items which meet the needs of their supply system from the categories of data available from the Federal Catalog System.

(b) *Regular file maintenance (RFM)*. This form of the file maintenance provides activities with data on a daily basis as transactions affect items upon which they are a registered user. It is used primarily by those activities which consider it essential to maintain file compatibility with the DLSC file at all times.

[42 FR 36255, July 14, 1977]

§ 101-30.402 Conversion.

Following completion of cataloging action, GSA will establish a time period in which conversion to the Federal Catalog System shall be accomplished by all civil agencies. The terminal dates for conversion will be established after consultation with the civil agencies concerned.

[29 FR 16004, Dec. 1, 1964]

§ 101-30.403 Utilization.

On and after the established date for completion of conversion, all inter-agency and intra-agency transactions involving item identifications, commodity classification, or stock numbers shall be in the terms of the Federal Catalog System.

[29 FR 16004, Dec. 1, 1964]
