

§ 101-37.1104

(e) Last point of departure and the point of intended landing;

(f) Position of the aircraft with reference to a geographical point;

(g) Number of persons aboard, number fatally injured, and number seriously injured;

(h) Nature of the accident, extent of damage, and the weather; and

(i) A description of any explosives, radioactive materials, or any other dangerous substances carried on the aircraft.

§ 101-37.1104 **What are my responsibilities for preserving aircraft wreckage, cargo, mail, and records resulting from aircraft accidents and incidents?**

You must assure that the operator of your aircraft is responsible for preserving to the extent possible any wreckage, cargo, and mail carried aboard the aircraft that was involved in an accident or incident. All records such as history data recordings of flight and maintenance information and voice recordings pertaining to the flight and all records pertaining to the operation and maintenance of the aircraft and to the airmen must be preserved until the NTSB takes custody. If items must be moved from the aircraft or the scene of the accident/incident for safety or health reasons, sketches, descriptive notes, or photographs should be made if possible of the original positions and conditions of items moved. If classified material is involved in an accident or incident, you must coordinate its protection and recovery with the National Transportation Safety Board as required by 49 CFR 830.10 and 831.12.

§ 101-37.1105 **What must I report regarding an aircraft accident, incident, or overdue aircraft?**

You must assure that the operator of your aircraft files a report on NTSB Form 6120.1 or 7120.2 within 10 days after an accident, or after 7 days if an overdue aircraft is still missing. A report involving a reportable incident shall be filed only if requested by the NTSB.

41 CFR Ch. 101 (7-1-02 Edition)

§ 101-37.1106 **What must I do when the NTSB investigates an accident or incident involving my aircraft?**

You should request designation as “party” to the investigation in accordance with 49 CFR 831.11 and assist the NTSB to the maximum extent possible. The NTSB shall allow you to participate in any investigation, except that you may not participate in the NTSB’s determination of the probable cause of the accident. You may conduct your own parallel investigation. You and the NTSB must exchange appropriate information obtained or developed in the course of the investigation(s) in a timely manner.

§ 101-37.1107 **What must I do if I observe a condition, act, maintenance problem, or circumstance that has the potential to cause an aviation related mishap?**

You must report such observations to a senior aviation safety manager of your agency.

§ 101-37.1108 **Why is it important that I be provided aircraft accident/incident related guidance in the form of this subpart, in addition to that found in 49 CFR parts 830 and 831?**

You may be excluded from some civil standards because of your unique operational and/or airworthiness requirements. Therefore, in addition to meeting the requirements found in 49 CFR parts 830 and 831, you must do the following: Make personnel who are knowledgeable about your missions and trained as aircraft accident investigators available to work with the NTSB. Develop accident and incident response plans. And understand that a parallel investigation may be conducted. Such teamwork will enhance both NTSB’s and your aircraft accident investigation and prevention efforts.

§ 101-37.1109 **What training must I have to participate in an NTSB investigation?**

You must be trained in aircraft accident investigation, reconstruction, and analysis. You must also receive aircraft accident investigation recurrency training and be familiar with NTSB accident investigation procedures.
