

Bureau of Land Management, Interior

§ 3137.89

days of obtaining the information, you must—

(1) File a statement, map and revised production allocation schedule under §3137.84 of this subpart requesting addition to the participating area of all committed tracts or portions of committed tracts in the unit area that meet the productivity criteria;

(2) If the proposed expanded participating area is outside the existing unit boundaries, invite all owners of oil and gas rights (leased or unleased) and lease interests (record title and operating rights) in such additional land to join the unit. If the owners of oil and gas rights in any tract of such land join the unit, you must submit to BLM—

(i) An application to enlarge the unit to include the expanded area;

(ii) A map showing the expanded area of the unit and the information with respect to each additional committed tract you proposed to add to the unit specified in §3137.23(c) of this subpart; and

(iii) A revised allocation schedule; and

(3) If any additional committed tract or tracts are added to the unit under paragraph (a)(2) of this section, you must file a statement, map and revised production allocation schedule under §3137.84 of this subpart requesting addition to the participating area of all such committed tracts or portions of such committed tracts in the unit area meeting the productivity criteria.

(b) If you obtain information demonstrating that the participating area should be smaller than previously determined, within 60 calendar days of obtaining the information, you must file a statement, map and revised production allocation schedule under §3137.84 of this subpart requesting removal from the participating area of all land that does not meet the productivity criteria.

§3137.87 What must I do if there are unleased Federal tracts in a participating area?

If there are unleased Federal tracts in a participating area, you must—

(a) Include the unleased Federal tracts in the participating area, even

though BLM will not share in unit costs;

(b) Allocate production for royalty purposes as if the unleased Federal tracts were leased and committed to the unit agreement under §3137.100 of this subpart;

(c) Admit Federal tracts leased after the effective date of the unit agreement into the unit agreement on the date the lease is effective; and

(d) Submit to BLM revised maps, a list of committed leases, and allocation schedules that reflect the commitment of the newly leased Federal tracts to the unit.

§3137.88 What happens when a well outside a participating area does not meet the productivity criteria?

If a well outside any of the established participating area(s) does not meet the productivity criteria, all operations on that well are non-unit operations and we will not revise the participating area. You must notify BLM within 60 calendar days after you determine a well does not meet the productivity criteria. You must conduct non-unit operations under the terms of the underlying lease or other federally-approved cooperative oil and gas agreements.

§3137.89 How does production allocation occur from wells that do not meet the productivity criteria?

(a) If a well that does not meet the productivity criteria was drilled before the unit was formed, the production is allocated on a lease or other federally-approved oil and gas agreement basis. You must pay and report the royalties from any such well either as specified in the underlying lease or other federally-approved oil and gas agreements.

(b) If you drilled a well after the unit was formed and the well is completed within an existing participating area, the production becomes a part of that participating area production even if it does not meet the productivity criteria. BLM may require the participating area to be revised under §3137.84 of this subpart.

(c) If a well not meeting the productivity criteria is outside a participating area, the production is allocated

§ 3137.90

as provided in paragraph (a) of this section.

§ 3137.90 Who must operate wells that do not meet the productivity criteria?

(a) If a well not meeting the productivity criteria was drilled before the unit was formed and is not included in the participating area, the operator of the well at the time the unit was formed may continue as operator.

(b) As unit operator, you must continue to operate wells drilled after unit formation not meeting the productivity criteria unless BLM approves a change in the designation of operator for those wells.

§ 3137.91 When will BLM allow a well previously determined to be a non-unit well to be used in establishing or modifying a PA?

If you, as the unit operator, complete sufficient work so that a well BLM previously determined to be a non-unit well now meets the productivity criteria, you must demonstrate this to BLM within 60 calendar days after you determine that the well meets the productivity criteria. You must then modify an existing participating area or establish a new participating area (see § 3137.84 of this subpart).

§ 3137.92 When does a participating area terminate?

(a) After contraction under § 3137.76 of this subpart, a participating area terminates 60 calendar days after BLM notifies you that there is insufficient production to meet the operating costs of that production, unless you show that within 60 calendar days after BLM's notification—

(1) Your operations to restore or establish new production are in progress; and

(2) You are diligently pursuing oil or gas production.

(b) If you demonstrate to BLM that reasons beyond your control prevent you, despite reasonable diligence, from meeting the requirements in paragraphs (a)(1) and (a)(2) of this section within 60 calendar days after BLM notifies you that there is insufficient production to meet the operating costs of that production, BLM will extend the

43 CFR Ch. II (10–1–02 Edition)

period of time to start those operations.

PRODUCTION ALLOCATION

§ 3137.100 How must I allocate production to the United States when a participating area includes unleased Federal lands?

(a) When a participating area includes unleased Federal lands, you must allocate production as if the unleased Federal lands were leased and committed to the unit agreement (see §§ 3137.80 and 3137.81 of this subpart). The obligation to pay royalty for production attributable to unleased Federal lands accrues from the later of the date the—

(1) Committed leases in the participating area that includes unleased Federal lands receive a production allocation; or

(2) Previously leased tracts within the participating area become unleased.

(b) The royalty rate applicable to production allocated to unleased Federal lands is the greater of 12½ percent or the highest royalty rate for any lease committed to the unit.

(c) The value of the production must be determined under the Minerals Management Service's oil and gas product value regulations at 30 CFR part 206.

OBLIGATIONS AND EXTENSIONS

§ 3137.110 Do the terms and conditions of a unit agreement modify Federal lease stipulations?

A unit agreement does not modify Federal lease stipulations.

§ 3137.111 When will BLM extend the primary term of all leases committed to a unit agreement?

(a) If the unit operator requests it, BLM will extend the primary term of all NPR–A leases committed to a unit agreement if, from anywhere in the unit area, there is—

(1) Actual production from a well that meets the productivity criteria;

(2) Actual or constructive drilling operations; or

(3) Actual or constructive reworking operations.

(b) BLM will extend all NPR–A leases committed to the unit, as provided in
