

### § 648.203

lb (907.2 kg) of Atlantic herring per day in such area pursuant to paragraph (e) of this section, except as provided in paragraphs (c) and (d) of this section. These limits shall be enforced based on a calendar day, without regard to the length of the trip.

(b) NMFS may raise the percent of the TAC that triggers imposition of the 2,000-lb (907.2-kg) limit specified in paragraph (a) of this section through the annual specification process described in § 648.200. Any lowering of the percent of the TAC that triggers the 2,000-lb (907.2-kg) limit specified in paragraph (a) of this section must be accomplished through the framework adjustment or amendment processes.

(c) A vessel may transit an area that is limited to the 2,000-lb (907.2-kg) limit specified in paragraph (a) of this section with > 2,000 lb (907.2 kg) of herring on board, providing all fishing gear is stowed and not available for immediate use as required by § 648.23(b).

(d) A vessel may land in an area that is limited to the 2,000-lb (907.2-kg) limit specified in paragraph (a) of this section with > 2,000 lb (907.2 kg) of herring on board, providing such herring were caught in an area or areas not subject to the 2,000-lb (907.2-kg) limit specified in paragraph (a) of this section and providing all fishing gear is stowed and not available for immediate use as required by § 648.23(b).

(e) NMFS shall implement fishing restrictions as specified in paragraph (a) of this section by publication of a notification in the FEDERAL REGISTER, without further opportunity for public comment.

(f) The TAC for Management Area 1A is divided into two seasonal periods. The first season extends from January 1 through May 31, and the second season extends from June 1 through December 31. Seasonal TACs for Area 1A shall be set through the annual specification process described in § 648.200.

[65 FR 77467, Dec. 11, 2000, as amended at 67 FR 3446, Jan. 24, 2002]

### § 648.203 Vessel size/horsepower limits.

(a) To catch, take, or harvest Atlantic herring, a U.S. vessel issued an Atlantic herring permit must not exceed the specifications contained in § 648.4(a)(10)(i)(B). If any such vessel ex-

### 50 CFR Ch. VI (10–1–02 Edition)

ceeds such specifications, its permit automatically becomes invalid and the vessel may not catch, take, or harvest Atlantic herring, as applicable, in or from the EEZ.

(b) A U.S. vessel issued an Atlantic herring processor permit may receive and process herring, providing such vessel is ≤ 165 feet (50.3 m) in length overall, and ≤ 750 GRT (680.4 mt). A U.S. vessel that is > 165 feet (50.3 m) in length overall, or > 750 GRT (680.4 mt), may only receive and process herring provided that the vessel is issued an “Atlantic herring processor permit” described in § 648.4(a)(10)(ii) and that the total amount of herring received or processed by such vessel does not exceed the USAP established in accordance with § 648.200.

### § 648.204 Herring roe restrictions.

(a) Retention of herring roe. Herring may be processed for roe, provided that the carcasses of the herring are not discarded at sea.

(b) Limits on the harvest of herring for roe. The Council may recommend to NMFS a limit on the amount of herring that may be harvested for roe to be implemented by framework adjustment in accordance with § 648.206.

### § 648.205 VMS requirements.

(a) Except for Atlantic herring carrier vessels, the owner or operator of any vessel issued an Atlantic herring permit that caught or landed > 500 mt of Atlantic herring in the previous fishing year, or intends to catch or land, or catches or lands > 500 mt of Atlantic herring in the current fishing year, must have an operable VMS unit installed on board that meets the requirements of § 648.9. The VMS unit must be certified, installed on board, and operable before the vessel may begin fishing.

(b) A vessel owner or operator, except an owner or operator of an Atlantic herring carrier vessel, who intends to catch and land > 500 mt of Atlantic herring must declare such intention to the Regional Administrator prior to obtaining an Atlantic herring fishing permit for the fishing year.

(c) Except for Atlantic herring carrier vessels, the owner or operator of a vessel is prohibited from landing > 500

## § 648.206

mt of Atlantic herring caught in or from the EEZ during a fishing year, unless in compliance with § 648.205(b).

### § 648.206 Framework provisions.

(a) *Annual review.* The Herring PDT, in consultation with the Commission's PRT, shall review the status of the stock and the fishery. The PDT shall review available data pertaining to commercial and recreational catches, current estimates of fishing mortality, stock status, estimates of recruitment, virtual population analysis, and other estimates of stock size, sea sampling and trawl survey data or, if sea sampling data are unavailable, length frequency information from trawl surveys, the impact of other fisheries on herring mortality, and any other relevant information. Based on this review, the PDT shall report to the Council's Herring Oversight Committee no later than July, any necessary adjustments to the management measures and recommendations for the Atlantic herring annual specifications. The PDT, in consultation with the PRT, shall recommend the specifications, as well as an estimated TAC, as required by § 648.200, for the following fishing year.

(b) Based on these recommendations, the Herring Oversight Committee shall further recommend to the Council any measures necessary to insure that the annual specifications shall not be exceeded. The Council shall review these recommendations and any public comment received and, after consulting with the Commission, shall recommend appropriate specifications to NMFS, as described in § 648.200. Any suggested revisions to management measures may be implemented through the framework process or through an amendment to the FMP.

(c) *Framework adjustment process.* In response to the annual review, or at any other time, the Council may initiate action to add or adjust management measures if it finds that action is necessary to meet or be consistent with the goals and objectives of the Atlantic herring FMP, or to address gear conflicts as defined under § 600.10 of this chapter.

(1) *Adjustment process.* After a management action has been initiated, the

Council shall develop and analyze appropriate management actions over the span of at least two Council meetings. The Council may delegate authority to the Herring Oversight Committee to conduct an initial review of the options being considered. The oversight committee shall review the options and relevant information, consider public comment, and make a recommendation to the Council.

(2) After the first framework meeting, the Council may refer the issue back to the Herring Oversight Committee for further consideration, make adjustments to the measures that were proposed, or approve of the measures and begin developing the necessary documents to support the framework adjustments. If the Council approves the proposed framework adjustments, the Council shall identify, at this meeting, a preferred alternative and/or identify the possible alternatives.

(3) A framework document shall be prepared that discusses and shows the impacts of the alternatives. It shall be available to the public prior to the second or final framework meeting.

(4) After developing management actions and receiving public testimony, the Council shall make a recommendation to NMFS. The Council's recommendation must include supporting rationale and, if changes to the management measures are recommended, an analysis of impacts and a recommendation to NMFS on whether to issue the management measures as a final rule. If the Council recommends that the management measures should be issued as a final rule, the Council must consider at least the following factors and provide support and analysis for each factor considered:

(i) Whether the availability of data on which the recommended management measures are based allows for adequate time to publish a proposed rule, and whether regulations have to be in place for an entire harvest/fishing season.

(ii) Whether there has been adequate notice and opportunity for participation by the public and members of the affected industry in the development of the Council's recommended management measures.
