

Fishery Conservation and Management

§ 648.73

Clam and Ocean Quahog FMP. The Assistant Administrator may set quotas at quantities different from the MAFMC's recommendations only if he/she can demonstrate that the MAFMC's recommendations violate the national standards of the Magnuson Act and the objectives of the Atlantic Surf Clam and Ocean Quahog FMP.

(2) *Report.* Prior to the beginning of each year, the Regional Administrator shall prepare a written report, based on the latest available stock assessment report prepared by NMFS, data reported by harvesters and processors according to these regulations, and other relevant data. The report will include consideration of:

(i) Exploitable biomass and spawning biomass relative to OY.

(ii) Fishing mortality rates relative to OY.

(iii) Magnitude of incoming recruitment.

(iv) Projected effort and corresponding catches.

(v) Status of areas previously closed to surf clams fishing that are to be opened during the year and areas likely to be closed to fishing during the year.

(vi) Geographical distribution of the catch relative to the geographical distribution of the resource.

(3) *Public review.* Based on the information presented in the report, and in consultation with the MAFMC, the Assistant Administrator shall propose an annual surf clam quota and an annual ocean quahog quota and shall publish them in the FEDERAL REGISTER. Comments on the proposed annual quotas may be submitted to the Regional Administrator within 30 days after publication. The Assistant Administrator shall consider all comments, determine the appropriate annual quotas, and publish the annual quotas in the FEDERAL REGISTER on or about December 1 of each year.

(b) *Ocean quahogs.* The amount of ocean quahogs that may be caught by fishing vessels subject to these regulations shall be specified annually by the Assistant Administrator, on or about December 1, within the range of 4 to 6 million bu (213 to 319.4 million L), following the same procedures set forth in

paragraph (a) of this section for surf clams.

§ 648.72 Minimum surf clam size.

(a) *Minimum length.* The minimum length for surf clams is 4.75 inches (12.065 cm).

(b) *Determination of compliance.* No more than 50 surf clams in any cage may be less than 4.75 inches (12.065 cm) in length. If more than 50 surf clams in any inspected cage of surf clams are less than 4.75 inches (12.065 cm) in length, all cages landed by the same vessel from the same trip are deemed to be in violation of the minimum size restriction.

(c) *Suspension.* Upon the recommendation of the MAFMC, the Regional Administrator may suspend annually, by publication in the FEDERAL REGISTER, the minimum shell-height standard, unless discard, catch, and survey data indicate that 30 percent of the surf clams are smaller than 4.75 inches (12.065 cm) and the overall reduced shell height is not attributable to beds where the growth of individual surf clams has been reduced because of density dependent factors.

(d) *Measurement.* Length is measured at the longest dimension of the surf clam shell.

§ 648.73 Closed areas.

(a) *Areas closed because of environmental degradation.* Certain areas are closed to all surf clam and ocean quahog fishing because of adverse environmental conditions. These areas will remain closed until the Assistant Administrator determines that the adverse environmental conditions no longer exist. If additional areas are identified by the Assistant Administrator as being contaminated by the introduction or presence of hazardous materials or pollutants, they may be closed by the Assistant Administrator in accordance with paragraph (c) of this section. The areas closed are:

(1) *Boston Foul Ground.* The waste disposal site known as the "Boston Foul Ground" and located at 42°2'36" N. lat., 70°35'00" W. long., with a radius of 1 nm in every direction from that point.

(2) *New York Bight.* The polluted area and waste disposal site known as the "New York Bight" and located at
