

§ 654.21

may be placed in the management area not earlier than 1 hour before sunrise on October 5.

(2) *After the fishing season.* The period of May 16 through May 20 is established as a trap removal period. A stone crab trap must be removed from the management area not later than 1 hour after sunset on May 20, unless an extension to the removal period is granted under paragraph (b)(2)(i) of this section and the extension authorization is carried aboard the fishing vessel as specified in paragraph (b)(2)(ii) of this section.

(i) An extension of the removal period may be granted by Florida in accordance with Rule 46-13.002(2)(b), Florida Administrative Code, in effect as of April 14, 1995. This incorporation by reference was approved by the Director of the Office of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from the Florida Marine Fisheries Commission, 2540 Executive Center Circle West, Suite 106, Tallahassee, FL 32301; telephone: 904-487-0554. Copies may be inspected at the office of the Regional Director, or the Office of the Federal Register, 800 North Capitol Street, N.W., Suite 700, Washington, DC.

(ii) The extension authorization must be carried aboard the fishing vessel. The operator of a fishing vessel must present the authorization for inspection upon request of an authorized officer.

(c) *Possession of stone crab traps.* A stone crab trap may not be possessed in the management area from the end of the trap removal period, or an extension thereto, to the beginning of the trap soak period, as specified in paragraph (b) of this section. A stone crab trap, float, or rope in the management area during this period will be considered unclaimed or abandoned property and may be disposed of in any manner considered appropriate by the Assistant Administrator or an authorized officer. An owner of such trap, float, or rope remains subject to appropriate civil penalties.

§ 654.21 Harvest limitations.

(a) *Claw size.* No person may remove from a stone crab in or from the man-

50 CFR Ch. VI (10-1-02 Edition)

agement area, or possess in the management area, a claw with a propodus measuring less than 2.75 inches (7.0 cm), measured in a straight line from the elbow to the tip of the lower immovable finger. The propodus is the largest section of the claw assembly that has both a movable and immovable finger and is located farthest from the body when the entire appendage is extended. (See Appendix A, Figure 1, of this part.)

(b) *Egg-bearing stone crabs.* An egg-bearing stone crab in or from the management area must be returned immediately to the water unharmed—without removal of a claw. An egg-bearing stone crab may not be stripped of its eggs or otherwise molested.

(c) *Holding stone crabs.* A live stone crab in or from the management area may be held aboard a vessel until such time as a legal-sized claw is removed, provided it is held in a container that is shaded from direct sunlight and it is wet with sea water as necessary to keep it in a damp condition. Containers holding stone crabs must be stacked in a manner that does not compress the crabs. A stone crab body from which a legal-sized claw has been removed must be returned to the sea before the vessel reaches shore or a port or dock.

§ 654.22 Gear restrictions.

(a) *Trap construction requirements.* No person fishing for stone crab may transport on the water or fish with any trap which does not meet the following requirements:

(1) Each trap must be constructed of wood, plastic, or wire.

(2) A trap may be no larger in dimension than 24 by 24 by 24 inches (61 by 61 by 61 cm) or 8.0 ft³ (0.23 m³).

(3) The throats (entrances) to all wood and plastic traps must be located on the top horizontal section of the trap. If the throat is longer in one dimension, the throat size in the longer dimension must not exceed 5½ inches (14.0 cm) and in the shorter dimension must not exceed 3½ inches (9.0 cm). If the throat is round, the throat size must not exceed 5 inches (12.7 cm) in diameter.

(4) In any wire trap used to harvest stone crabs, each throat must be horizontally oriented. The width of the
